Nonwoven fabric / Nonwoven textile roll

Nonwoven roll

Disposable Hygienic Covers for Examination Tables

A practical solution for single-use covering of examination and treatment tables. MEDILAB ROLLS covers provide a hygienic barrier between the patient and the table surface and are designed to help protect patients from contamination.

MEDILAB ROLLS – STANDARD

A disposable roll cover made of nonwoven fabric with a basis weight of 25 g/m². Suitable for routine use on examination and treatment tables in outpatient clinics and other healthcare facilities.

Product description – 25 g/m² • nonwoven fabric • single-use	Code	pcs/box

MEDILAB ROLLS – PROTECT

A disposable roll cover made of nonwoven fabric with an impermeable polyethylene (PE) layer. The PE layer protects the table from liquid penetration and contributes to the product's strength.

Suitable for healthcare facilities with increased requirements for protecting table surfaces against liquids.

Product description – Nonwoven fabric + PE • waterproof • enhanced leak protection	Code	pcs/box
